

# AUXETIC 2.0

Feel every shot and get more confidence in your game with HEAD Auxetic 2.0 technology. It actively responds, giving real-time, super-accurate feedback. It really is SENSATIONAL.

## WHAT IS AUXETIC 2.0?

Auxetic engineering gives a unique experience compared to non-Auxetic constructions. Due to their internal properties, Auxetic constructions expand when a "pull" force is applied and contract when squeezed. The bigger the applied force, the bigger the Auxetic reaction. The Auxetic cage means you feel the impact right when and where the action happens, it is the ultimate connection between player and racquet.

## WHERE IS IT LOCATED?

Auxetic 2.0 is designed to react to ball impact and give the best contact feel by adapting its internal structure. Based on extensive research, we optimized its placement in both the carbon engineered yoke of the racquet and at the end of the grip. Double the connection and double the engineering in every swing.

## AUXETIC CAGE

Our revolutionary carbon structure within the end grip utilises Auxetic 2.0 technology for the ultimate connection between you and your racquet, giving a FEEL like never before.

GRAPHENE  
INSIDE

## GRAPHENE INSIDE

Strategically positioned in most of our racquets, GRAPHENE strengthens the frame, provides greater stability and optimizes energy transfer from racquet to ball. When you buy your next racquet, be sure it has GRAPHENE inside.

## WHAT IS THE BENEFIT?

Auxetic 2.0 actively responds by adapting its internal structure giving superb feedback and a good solid impact feel. On ball impact, a large force is applied to the yoke piece, caused by the strings pulling it towards the center of the racquet. Depending on where the ball impacts the string bed, the force will be applied at different locations in the yoke piece.
